

 **VITA STR**
SWIM TRAIN RENEW

Enjoy the benefits of outdoor swimming all year long in a Vita Spa STR swim spa. In many places of the world the outdoor swimming season is short and heating a conventional in-ground pool is expensive and impractical. Vita STR swim spas give the opportunity to Swim, Train, and Renew or just entertain guests any time of the year without the hassle and cost of a swimming pool. Never worry about winterizing your swimming pool again, Vita STR swim spas are made with the same high efficiency Northern Exposure[®] insulation system as our hot tubs. Additionally the locking insulated cover means your swim spa is hot and ready to use any time of the year.

SWIM

Swimming has long been known as the ultimate zero-impact exercise and is widely **prescribed by physicians** to patients who want to get in shape or tone their body. Vita STR swim spas employ two different water propulsion systems that work in concert with its open floor plan design. Choose a multi jet deep stream for exercise or the MAAX Force™ swim system for the ultimate endless current swimming experience. The observation seats and well marked swim lanes provide the **optimum swim training center** for your entire family.

TRAIN

A wide variety of aerobic exercises are possible in a Vita STR Swim Spa. Aqua jogging is especially effective as the deep water neutralizes the effects of gravity while increasing resistance for an amazing low impact workout. **Fitness experts recommend** a warm water fitness regimen to maximize weight loss. Your Vita STR can also be equipped with the aquatic exercise equipment package that features modern resistance band technology. Attach the resistance bands to perform a **complete toning program**.

RENEW

When you are finished working out, sit back, and relax for a complete spa experience. Let the hydrotherapy jets massage those tight, sore muscles. A recent study shows even a 10 minute massage improves muscle recovery after working out. Combined with elements of luxurious space and sound capabilities, your swim spa helps you completely recuperate so you can face tomorrow at full capacity.

4 SEASONS

Owning a swim spa allows you the convenience of enjoying it year-round on your schedule. Invite your friends or that special someone over to enjoy the soothing waters with you. Whether working on your tan or snuggling up to get warm, swim spas offer a variety of indulgences to embrace the beauty of your own back yard in every season.

Northern Exposure

Northern Exposure® is the ultimate hot tub insulation system. This patent pending thermal barrier technology recycles the free heat energy for more efficient heating and lower energy costs. All four sides of the spa, plus the floor and cover are lined with reflective copper material to reflect radiant heat energy generated from the pumps back into the spa. Heat is absorbed back into the plumbing helping raise and maintain water temperature. Finally the entire exterior of the hot tub is wrapped in 3M Thinsulate® Insulation, the same incredible material utilized in winter clothing. This three layer patent pending system ensures energy created by the spa stays in the spa.

HYDRO- DYNAMICS

The jet propulsion system on the STR series swim spas uses proprietary 'Anti-Turbulence' technology to boost and smooth the swim stream for the ultimate swimming experience. **Anti-turbulence technology** creates a powerful, smooth, variable jet stream that is completely adjustable and designed to allow you to swim at your individual fitness level.

The STR's jet propulsion system has **advantages over propellers or paddles** when creating a better swim stream. It is over 30" wide and easily produces a powerful swimming experience.

CLARITY

When you are finished working out, sit back and relax for a complete spa experience. Let the hydrotherapy jets massage those tight, sore muscles. A recent study shows a 10 minute massage improves muscle recovery after working out. Owning a swim spa allows you the convenience of enjoying it year round on your schedule. Invite your friends or that special someone over to enjoy the soothing waters with you.

High quality water treatment is one of the most important features to consider when evaluating a spa. Both CleanZone and CleanZone Ultra utilize ozone to sanitize your water. CleanZone® Ultra adds UVC light, the same technology utilized in many communities around the world to purify drinking water. CleanZone® Ultra kills 99.9% of microorganisms, bacteria, viruses, and parasites, making this the perfect sanitization system for your spa.

Ozone/UV Combination

Ozone only

VITA STR

SWIM TRAIN RENEW

Athletes and workouts come in all sizes, and there is a Vita STR series swim spa for each of them. From twelve feet for quality workouts in compact spaces, to eighteen feet with a separate hot tub, find the swim spa that meets your backyard space, massage needs, and fitness goals.
